Finding ROI for DFMA in Low Volume, High Mix Environments

**Robert B. Male, P.E., Ph.D.
Cameron F. Sullivan MBA**

L-3 Communications – CSW

- State-of-the-Art provider of secure, real-time data communications - connecting space, airborne, ground and sea-based platforms
- Equipment on virtually every mission-critical aircraft platform, from the pioneering U-2 and P-3 to the unmanned Predator and Global Hawk.

Robert Male

- PhD in Mechanical Engineering
- Leader/Manager/Engineer with 25+ years in Product Development (GE, Teledyne, Danaher, Standex)
- DFMA fanatic, Dry Land SSBB, TLS

Cameron Sullivan

- BSME and MBA with 10 years experience
- Product Development, DFMA, Six Sigma and TOC
- Adjunct Professor in Mathematics

Is there ROI in low-volume DFMA?

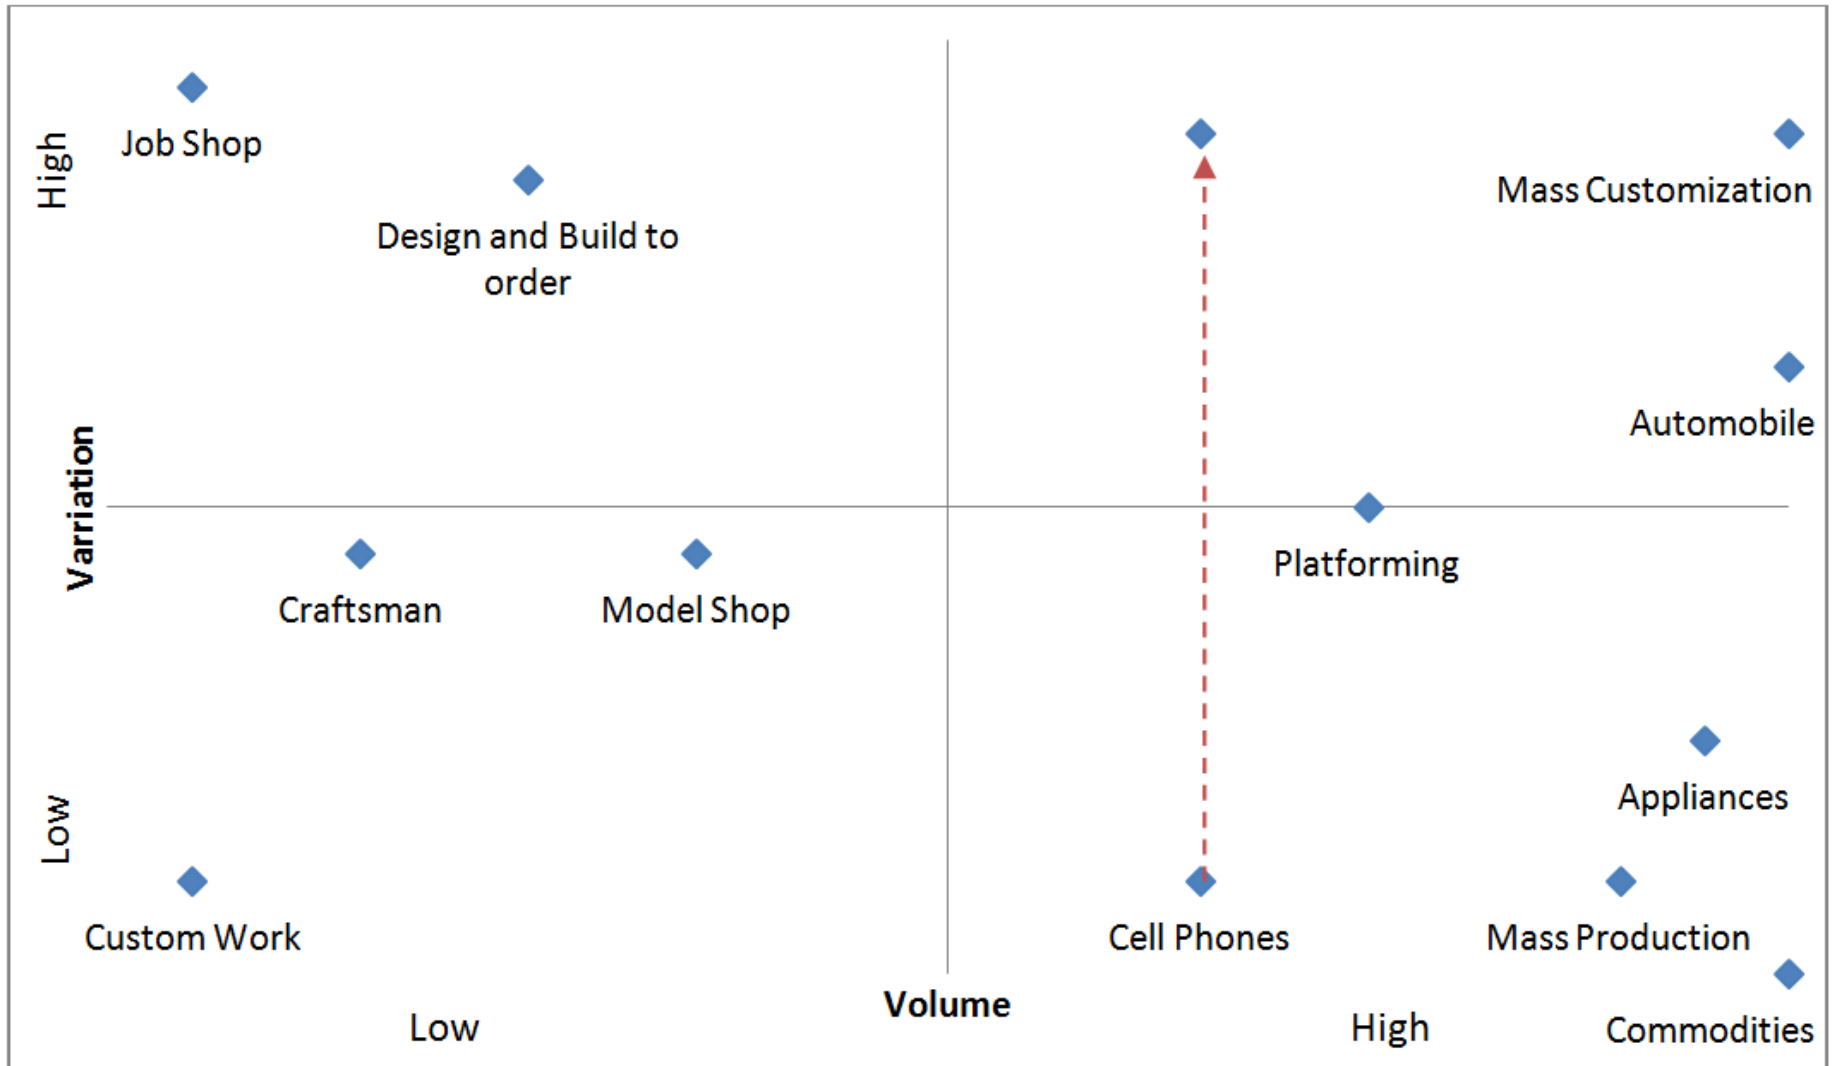

Communication Systems-West

We can't do DFMA!

We are only making a few!

How do you justify DFMA for
low volume ?

Market Space Model

Equations of Interest

$$\text{ROI} = \frac{\text{Benefit} - \text{Cost}}{\text{Cost}}$$

$$\text{Value} = \frac{\text{Benefit}}{\text{Cost}}$$

$$\text{ROI} = \text{Value} - 1$$

Cost of Product =

- Material costs
- Assembly Labor
- Overhead
- Non-Recurring Expenses
- Rework costs
- + Scrap

Traditional Cost Focus Here

ROI – How much is Enough?

Because of the intrinsic benefits of DFMA, any positive ROI is worthwhile!

Good DFMA

- prevents problems on the factory floor
- frees resources to add value
- promotes on-time delivery

What opportunities are you missing due to fire fighting?

Monetizing Benefits

- Shortened development cycle
- Reductions in engineering change orders
- Less Expensive parts
- Reductions of Internal churn (defects, rework, etc)
- Reduction of Lead Time!

Process to drive ROI with DFMA

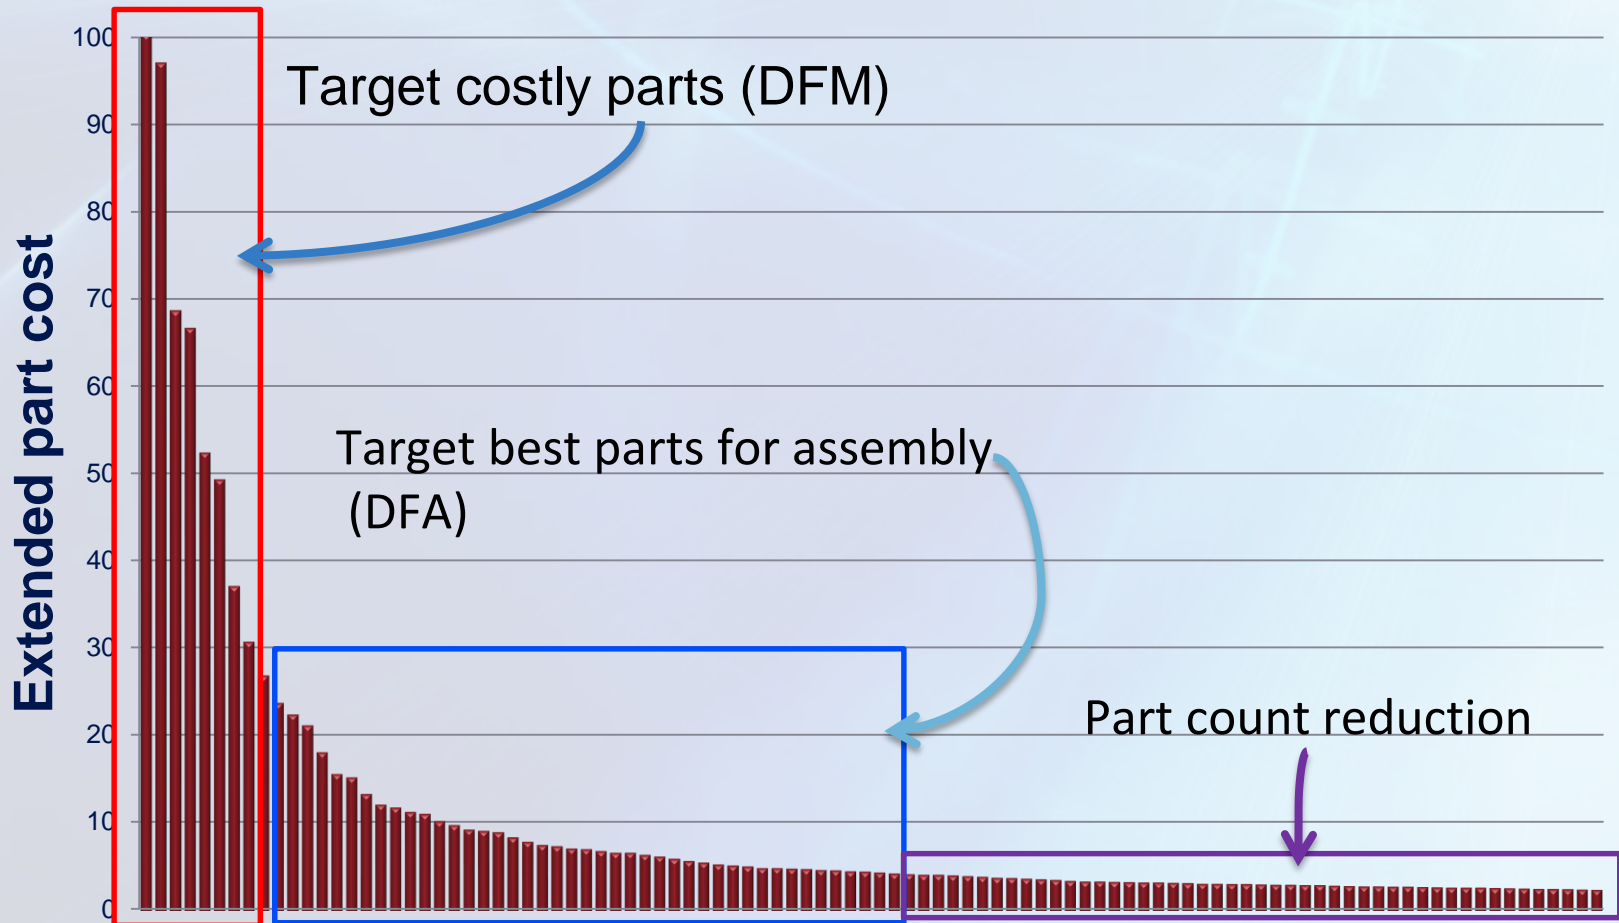

Communication Systems-West

Selective Deployment

Part cost Pareto

Examples of Selective Deployment

Communication Systems-West

Examples of Selective Deployment

Communication Systems-West

Examples of Selective Deployment

Communication Systems-West

- The benefits of DFMA extend to the manufacturer as well as to the consumer
- DFMA works in low volume situations because it increases value.
 - Costs are contained
 - Resources are freed up
 - Better on-time delivery
- Selective deployment of DFMA will produce a positive ROI in low volume environments.
