# Agenda

- Introduction to Dell Technologies and Dell EMC
- DFX at Dell EMC
- DFMA<sup>®</sup> Deployment at Dell EMC
- DFMA<sup>®</sup> Applications at Dell EMC
- DFMA<sup>®</sup> Examples
- Summary

# Dell Technologies

- Largest private technology company
  - ~140,000 employees
  - 180+ countries globally
- Address the markets for scale-out architecture, converged infrastructure and private cloud computing
- Collective force of innovative capabilities trusted to provide technology solutions and services that accelerate digital transformation

# Dell EMC

- Dell EMC, is a member of Dell Technologies unique family of businesses
  - 70,000+ employees
  - 80+ locations globally
- Dell EMC provides solutions that help modernize, automate and transform data centers with industry-leading servers, storage, cloud computing and converged infrastructure technology

# DFX at Dell EMC

## The DFX Team

- Part of Dell manufacturing
- Focused on Dell EMC products
- Team of 3 Manufacturing Engineers
- Influence role working closely with Dell EMC cross-functional teams

## Our Mission

- Help ensure cost, quality and cycle-time targets are achieved

## Our Focus

- Custom platform designs
- System integration
- Off-the-shelf platforms

Photos from: [www.emc.com](http://www.emc.com)

# Why DFMA<sup>®</sup>?

## ■ More Effective Influence Model

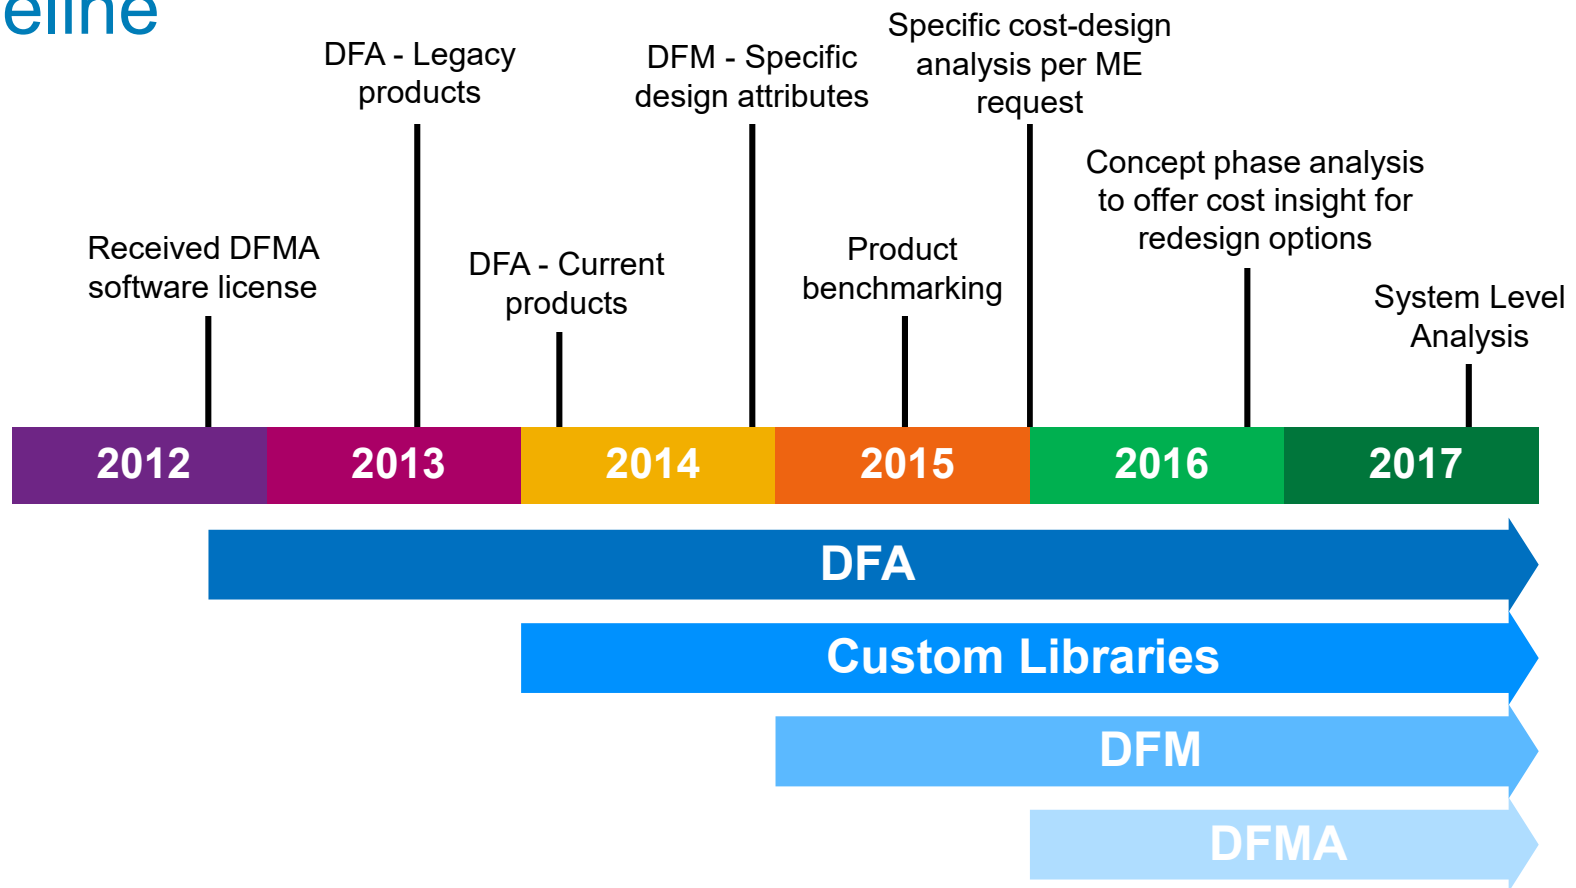

- Design improvement proposals supported with accurate cost estimates
- Quantitative, cost based, design options

Photo from: [www.google.com](http://www.google.com)

# Timeline

# DFMA<sup>®</sup> Deployment at Dell EMC

- 1 Detailed BOM analysis  
**Time consuming**
- 2 High level integration analysis  
**Not enough detail**
- 3 High level integration analysis  
High level functional component analysis  
**Good balance**
- 4 High level integration analysis  
High level functional component analysis  
Detailed analysis of key areas  
**More effective**

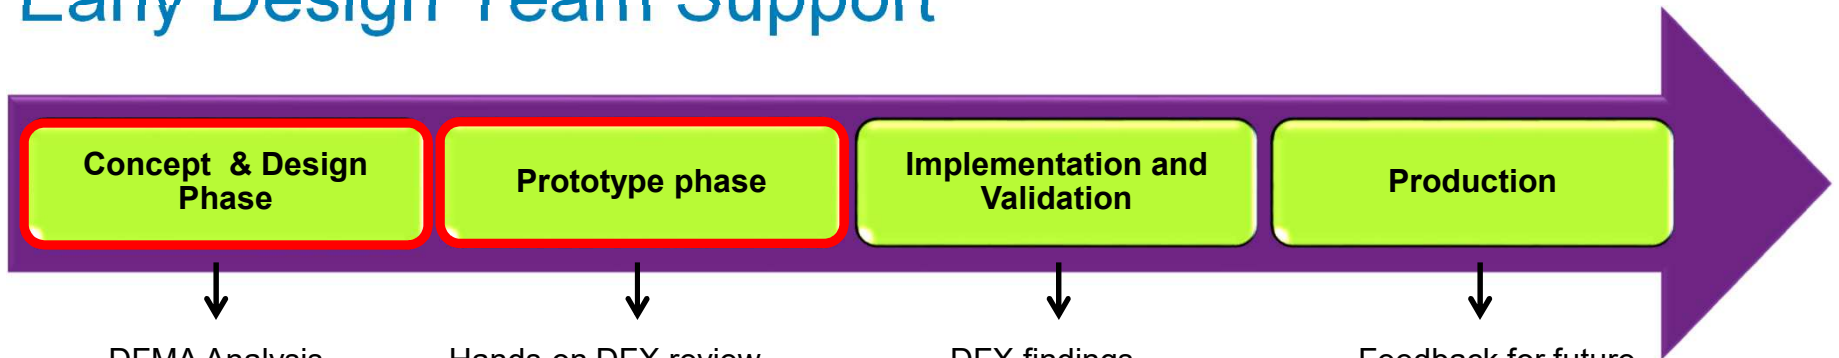

# DFMA<sup>®</sup> Applications at Dell EMC

- **Early Design Team Support**
  - Design simplification and best practices
- Benchmarking
  - Product benchmarking and trend analysis
- Design Improvement
  - Cost-optimization analysis

# Early Design Team Support

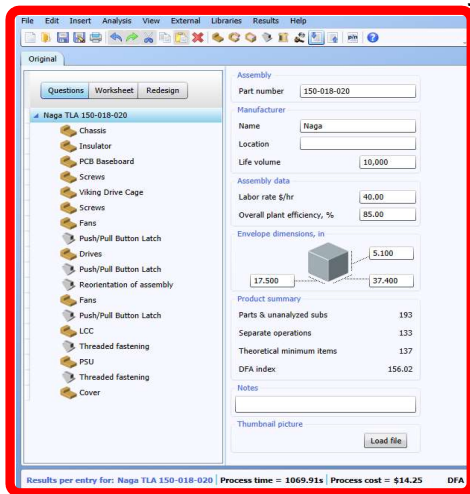

DFMA Analysis  
CAD reviews

Hands-on DFX review  
DFMA analysis (if required)

DFX findings  
Implement improvements  
Validation

Feedback for future  
designs

Triton Proto Issue List							
Issue No.	Issue Status	Hardware Description	OPT #	Issue	Photo?	Notes	Submitter
1	Open	Chassis-Rail Mounting		Side mount to rack rails not desired. You must remove fan to mount.	Y	Issue raised at DFX Review 11/22/13. UPDATE(12/5/13) Larry F: NPTE status	Jim Buckley
2	Open	BBU tray		Label location for BBU tray is not defined	Y	Issue raised at DFX Review 11/22/13. UPDATE(12/5/13) Larry F: To extend bottom frame outward for label space. OPEN status.	Jim Buckley
3	Open	Airwave		Fan insertion not keyed. Can insert fully the wrong way	Y	Issue raised at DFX Review 11/22/13. UPDATE(12/5/13) Larry F: Will add feature to key. OPEN status.	Jim Buckley
4	Open	Airwave		Fan label not easy to scan; it is upside down	Y	Issue raised at DFX Review 11/22/13. UPDATE(12/5/13) Jim B: Will verify BOM on when when the Airwave is scanned. OPEN status.	Jim Buckley
5	Open	Labels		Need labels on all locations (SLCs, Fans, PSs, etc) NOT EMBOSSED [unless absolutely necessary]		Issue raised at DFX Review 11/22/13. UPDATE(12/5/13) Larry F: Will verify on next DFX review. OPEN status.	Dan Hewitt
6	New	BBU Tray		Need customer facing surface large enough to place FRU label (barcode SR & FN)		Issue raised at DFX Review 11/22/13. UPDATE(12/5/13) Larry F: Duplicate of issue # 2.	Van J.
7	New	Battery Module		Label are up-side-down in Triton	Y	Issue raised at DFX Review 11/22/13. UPDATE(12/5/13) Larry F: NPTE status	Jeff Moore
8	New	SP Tray-Fan area		Check that slot behind 2nd fan will pass USB cable		Issue raised at DFX Review 11/26/13. UPDATE(12/5/13) Larry F: Will verify on next DFX review. TBV status.	Jeff Moore
9	New	SP Tray-Fan area		Could we locate USB connector at far left of fan?	Y	Issue raised at DFX Review 11/26/13. UPDATE(12/5/13) Larry F: NPTE status	Jeff Moore
10	New	Mounting Rails		Will the Triton use the same mounting rails as Megatron?		Issue raised through email 12/3/13. UPDATE(12/5/13) Larry F: No, they are different. New bezel, new rails, new clips. CLOSED status.	Ben Conroy

# Design Simplification and Best Practices

## Concerns & Suggestions

- Interferences
- Complexity
- EMI shielding
- Poke Yoke/keying
- Tool-less securing
- Reduce screw count
- Simplify design
- Accessibility/visibility

# DFMA<sup>®</sup> Applications at Dell EMC

- Early Design Team Support
  - Design simplification and best practices
- **Product Benchmarking**
  - **Benchmarking and trend analysis**
- Design Improvement
  - Cost-optimization analysis

Photo from: [www.emc.com](http://www.emc.com)

# Product Benchmarking

	Product A	Product B	Product C
<b>U size</b>	<b>4</b>	<b>5</b>	<b>2</b>
<b>Parts &amp; unanalyzed subs</b>	<b>25</b>	<b>99</b>	<b>11</b>

# Filler Material DFM Example

	2MM MODIFIED ABS PLASTICS	0.5MM SS	0.5 PRE-PLATE STEEL	0.8 PRE-PLATE STEEL
<b>PER PRODUCT COSTS, \$</b>				
Assembly process	0.22	1.10	1.10	1.10
Manufacturing piece part	1.72	4.95	1.80	2.38
Total cost w/o tooling	1.94	6.05	2.90	3.48
Total tooling cost	1.23	0.96	0.96	0.96
<b>Total cost</b>	<b>3.17</b>	<b>7.01</b>	<b>3.87</b>	<b>4.44</b>
<b>TOTAL TOOLING INVESTMENT, \$</b>				
Assembly tools & fixtures	0	0	0	0
Manufacturing tooling	122,880	96,411	96,411	96,448
Total investment	122,880	96,411	96,411	96,448
<b>PRODUCTION LIFE DATA &amp; WEIGHT</b>				
Life volume	100,000	100,000	100,000	100,000
Total production life cost, \$	316,637	701,461	386,705	444,378
Total weight, lb	0.75	0.10	0.10	0.16

# Drive Latch DFMA Example

# Drive Latch DFMA Example

**Current Design**  
Strap with dangling handle

**Proposed Redesign**  
Strap with hinged handle

# Drive Latch DFMA Example

<i>Current Design</i>	Piece Part Cost	Assy Process Cost
Divider	\$0.38	\$0.16
Strap	N/A	\$0.10
Handle	\$0.62	\$0.40
Strap Clamp	\$0.05	\$0.18
Sub-Total	\$1.05	\$0.84
<b>TOTAL</b>	<b>\$1.89</b>	

<i>Proposed Redesign</i>	Piece Part Cost	Assy Process Cost
Modified Divider	\$0.37	\$0.16
Strap	N/A	\$0.10
Modified Handle	\$0.63	\$0.34
Strap Support	\$0.09	\$0.02
Sub-Total	\$0.80	\$0.91
<b>TOTAL</b>	<b>\$1.71</b>	

Latches per Assembly	Total Savings per Assembly	Assemblies in Product	Total Savings per Product
4	\$0.72	23	\$16.56

**9.5% Cost Reduction**

# Chassis Redesign DFMA Example

## Current Design

Chassis with removable tray to support multiple PCB's

## Proposed Redesign

Eliminate the removable tray & incorporate tray features into the chassis.

# Chassis Redesign DFMA Example

Current Design (w/ Tray)	Piece Part Cost
Base Chassis	\$5.25
Removable Tray	\$4.06
Board Support	\$1.08
<b>Total</b>	<b>\$10.39</b>

Proposed Redesign (No Tray)	Piece Part Cost
Chassis w/ Tray Features	\$5.25
Removable Tray	\$0.00
Updated Board Support	\$1.30
<b>Total</b>	<b>\$6.55</b>

	Process Time	Process Cost	Piece Part Cost	Total Cost
Current Design (w/ Tray)	1.97 mins	\$1.55	\$10.39	\$11.94
Re-Design (No Tray)	1.55 mins	\$1.22	\$6.55	\$7.77
<b>SAVINGS</b>	<b>0.42 mins</b>	<b>\$0.33</b>	<b>\$3.84</b>	<b>\$4.17</b>

35% Cost Reduction

**How is this different than  
the traditional approach  
taken by supplier  
engineers?**

**DFX  
Engineering Model**

Relative Costing

Negotiate with Design Team

Improve Design

Assembly Focused

Primarily DFA

**Supplier  
Engineering Model**

Should Costing

Negotiate with Suppliers

Lower Cost

Part Focused

Primarily DFM

# Benefits of DFMA<sup>®</sup> at Dell EMC

- Make compelling design recommendations using quantitative data
- Help identify possible areas of design/cost improvements
  - Material
  - Process
  - Relative Costing
  - Product Simplification
- Systematic analysis gives a thorough understanding of the design
- Analyze designs early, even without a CAD model
- DFMA<sup>®</sup> is easily customizable to fit the needs of our industry/process
  - Libraries
  - Materials
  - Operations
  - Tools/machines
  - Labor rates

# What's Next?

## DFMA Strategy

- Increased Collaboration
  - Further engagement with Supplier and Industrial Design Engineering
- DFMA Training
  - DFX Advocates
- Improved DFMA Capabilities
  - Libraries of standard parts and fasteners
  - System level DFA analysis
